

December 14, 2023

Good morning! It's Jason from 752 and I'm here this Thoughtful Thursday on behalf of the S.E.A.L Team.

Did you know that today is National Energy Conversation Day. Let's take a moment to think about how much energy is wasted everyday due to multiple actions that people will do. Over 68% of all energy produced ends up not being used for anything. Why is this the case? Well, its quite simple, many people end up wasting energy on little things that they think will never affect anybody, this can include leaving the lights open, leaving the water on, and just leaving wires on. So, take a moment today to do a small action like closing the faucets, closing the lights, and getting rid of any wires that you do not need. Even if only a few people listen to these, it could save energy that could be used for other actions like treatment for sickness or even going to the moon.

Thanks for listening have a Think Before You Waste Thursday 😊

SEAL Team pledge:

We are the Dyker S.E.A.L. Team

Positivity is our dream

We teach it every day

To help others live the optimistic way

We learn to control our emotions and feelings

So, we always have effective social dealings

No stone left unturned; no person left behind

Every member of our team has the power to be kind

We spread kindness to our friends, families, and those who need a smile

When facing hardships and adversity, the S.E.A.L. Team goes the extra mile
